

What is a Chiropractor?

A Chiropractor is an individual who, by virtue of education, training, and examination holds a license to practice chiropractic in Mississippi. The law in the Mississippi Code of 1972, as amended, defines the practice of chiropractic as the following.

SECTION 73-6-1 states:

(1) The practice of chiropractic involves the analysis of any interference with normal nerve transmission and expression, and the procedure preparatory to and complementary to the correction thereof, by adjustment and/or manipulation of the articulations of the vertebral column and its immediate articulations for the restoration and maintenance of health without the use of drugs or surgery.

(2) The chiropractic adjustment and/or manipulation of the articulations of the human body may include manual adjustments and/or manipulations and adjustments and/or manipulations by means of electrical and mechanical devices which produce traction or vibration. Chiropractors licensed under this chapter may also use in conjunction with adjustments and/or manipulations of the spinal structures electrical therapeutic modalities which induce heat or electrical current beneath the skin, including therapeutic ultrasound, galvanism, diathermy and electromuscular stimulation.

(3) Chiropractors licensed under this chapter may utilize those electric therapeutic modalities described in subsection (2) of this section only after the chiropractor has completed a course of study containing a minimum of one hundred twenty (120) hours of instruction in the proper utilization of those procedures in accordance with the guidelines set forth by the Council on Chiropractic Education, or its successor, and is qualified and so certified in that proper utilization.

(4) Chiropractors shall not prescribe or administer medicine to patients, perform surgery, practice obstetrics or osteopathy. Chiropractors shall be authorized to recommend, dispense or sell vitamins or food supplements.

(5) Chiropractors shall not use venipuncture, capillary puncture, acupuncture or any other technique which is invasive of the human body either by penetrating the skin or through any of the orifices of the body or through the use of colonics.

(6) A person professing to practice chiropractic for compensation must bring to the exercise of that person's profession a reasonable degree of care and skill. Any injury resulting from a want of such care and skill shall be a tort for which a recovery may be had. If a chiropractor performs upon a patient any act authorized to be performed under this chapter but which act also constitutes a standard procedure of the practice of medicine including, but not limited to, the use of modalities such as those described in subsection (2) of this section and X-rays under similar circumstances, the chiropractor shall be held to the same standard of care as would licensed doctors of medicine who are qualified to and who actually perform those acts under similar conditions and like circumstances.

(7) Chiropractors licensed under this chapter are authorized to refer patients to licensed physical therapists for treatment.

(8) Doctors of chiropractic medicine may respond on a referral basis and under the direct and immediate supervision of a Mississippi licensed veterinarian to calls for animals requiring their professional services provided the chiropractor has a current license from the State Board of Chiropractic

Examiners and the chiropractor has completed a Mississippi Board of Veterinary Medicine approved animal chiropractic course.
